

A lecture on Africa, by Dr. Delany, was given in the Third Baptist Church, Eastern District, on Thursday evening, October 24<sup>th</sup>. Preparatory to the lecture, Rev. B. N. C. Worrick was chosen Chairman, and Mr. S. N. Geers, Secretary. The Chairman then introduced the Doctor, who said that it was not his intention to get the colored people of this country to emigrate to Africa, but to impart information. All people, he said, were not adapted for Africa. People who were not enterprising and beneficial, to society here were not fit for Africa. None should go but those who could help to develop the intelligence and resources of the country. He gave an interesting account of the social condition of the natives, showing their habits, customs and morals, and spoke particularly of the great respect paid to woman, especially the aged.
